Preparation comparison: k = 3, data distance 9 (preparation distances differ)
After error cancellation and protocol switching
Rotation error per teleportation
Residual paper angle |ϕ| (rad)
H1, m=2, d_p=6
H1, m=1, d_p=3
H3, m=2, d_p=6
H3, m=1, d_p=3
Assumed finite-noise preparation model
Preparation success probability
Residual paper angle |ϕ| (rad)
H1, m=2, d_p=6
H1, m=1, d_p=3
H3, m=2, d_p=6
H3, m=1, d_p=3
Each curve includes original-STAR switching. Logical errors during preparation are accounted for separately.
